Your Trusted Solution Provider

“Long-lasting, sustainable solutions in East Africa.”

Located in Ruiru, Kenya, Danco is part of the Spinners and Spinners Group with over 40 years of manufacturing experience. With state-of-the-art facilities, the company focuses on providing long-lasting, sustainable solutions in East Africa.

Danco's large operational capacity and fully certified laboratory is central to our service proposition – ensuring every product is delivered according to International Standards. We partner with a number of international partners to bring end-to-end solution to the water, sanitation, agriculture and telecom sectors in the region. These partners include Dorot and AVK (Valves), Unidelta (HDPE fittings), Diehl metering (Metering solutions), Hurner (Welding solutions), and Agru (HDPE piping and fittings) amongst others.

“End-to-end solution to the water, sanitation, agriculture, and telecom sectors in the region...”

WHO WE ARE

VISION

IMPROVING LIVES

With innovative and sustainable solutions

MISSION

IMPROVING QUALITY OF LIFE IN AFRICA

By providing trusted and sustainable water, sanitation and telecom solutions for infrastructure, domestic, and agricultural use.

VALUES

TRUST & INTEGRITY, QUALITY, INNOVATION, CONTINUOUS LEARNING, OWNERSHIP & ACCOUNTABILITY, TEAMWORK.

OUR SERVICES

Danco offers unparalleled technical expertise and customer delivery. ”

Our **AFTER SALES** team is available to ensure that all queries are dealt with promptly.

TRAINING SERVICES including on-site welding and installation workshops.

Semi-automatic butt welding and electrofusion **TECHNOLOGY** with auditable welding reports.

BEST PRACTISES advisory on service connection and transitional pipelines.

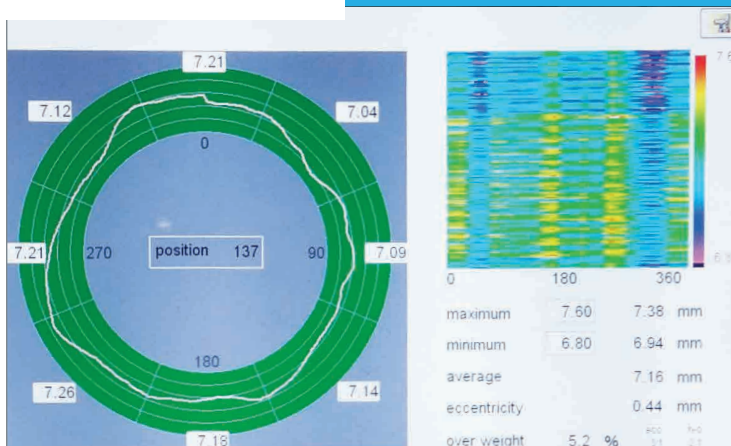

CERTIFIED WELDING team takes care of butt fusion and electrofusion.

➤ HDPE PIPES & FITTINGS

At Danco we believe in improving lives through long-term sustainable solutions. Clean water is a human right. Water is essential for growth, prosperity, and a better standard of living. Central to our proposition is educating all stakeholders that a trusted, reliable solution can be achieved through making a stand and NOT compromising with quality.

“Clean water is a human right...”

AQUAFLEX
HDPE PIPES & FITTINGS

AquaFlex pipes are unique because:

- We rigorously test and manufacture to adhere to ISO 4427
- Are 100% virgin material, traceable to source
- Our ON LINE scanner ensures uniform thickness
- Our fully-certified lab tests every pipe.

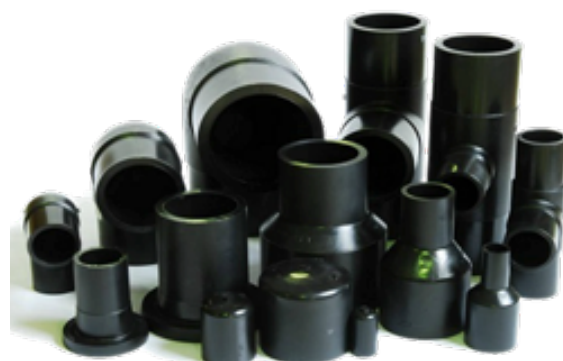

HDPE ADVANTAGES:

Lower life-cycle costs

- 100 year life
- Abrasion and corrosion-resistant
- Leak tight
- Strongest Joints
- Excellent surge resistance
- Low repair maintenance
- Maintains optimum flow rates
- The piping system of choice

Reduced installation costs

- Flexibility
- Fewer fittings
- Light weight
- Quicker delivery time
- Quick installation
- Minimum thrust blocks
- Robust, joining system
- No DIG technique

➤ PIPE JOINING SOLUTIONS

WATER

HÜRNER
SCHWEISSTECHNIK

We offer technical expertise, training, and customer delivery. Our technical team can help make your piping systems more effective and cost-productive. Additionally, we offer training and presentations for both technical teams and installers to help improve delivery. We also have a fully certified welding workshop, offering full service on Hürner Welding machines and joining services for butt welding and electrofusion at site.

AUTOMATED METER READING

Smart meters:

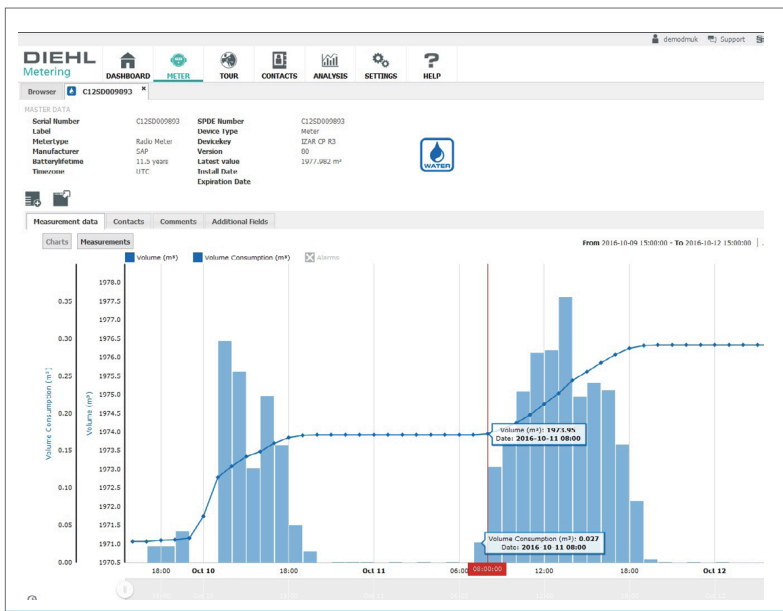

- Higher accuracy
- Longer life
- Increase revenue

Reduce commercial losses by over 15% using accurate meters

In partnership with Diehl Metering to provide a drive by or a fixed network solution. AMR modules can be fixed onto any smart meter and will help reduce commercial losses by over 7% and improve water management.

AMR Dashboard

Why choose DIEHL:

- 15 year lifetime
- 2-year manufacturer's warranty
- All meters are IMD, OIML and ISO approved
- All meters are AMR ready
- All meters are tamper proof:
- Magnetic tamper up to 1,500 gauss
- Hot needle tamper proof
- Higher accuracy for better revenue collection
- Danco's service center.

➤ PPR PIPES

AQUAFLO
PPR PIPES & FITTINGS

Danco Aquaflo pipes are manufactured under maximum precision to International Standards ISO 15874. Our Aquaflo pipes are fully printed and offer you the peace of mind of no leaks and surprises. This offers an excellent value for money, reliability, and builds reputation with our customers.

Key features:

- 100% virgin material
- Manufactured to the correct wall thickness
- No use of filler or calcium carbonate
- 30 year lifetime
- Lab tested to DIN and ISO 15874

“Leaks are more expensive
than buying the right pipe”

VALVES

Specializing in Gate valves, Butterfly valves, Air valves and Service connection systems.

We have partnered with two top players in the market for our different range of products. Both companies have superior quality valves and there is little or no difference in the body and mechanism of the valves.

The valves, available up to 1,000mm, have a GSK certification to prevent corrosion and are ultra-strong with a lifetime of over 30 years.

➤ DOUBLE WALL CORRUGATED PIPES

DWC is set to revolutionize piping for sanitation and drainage

SANIFLEX
DWC PIPES & FITTINGS

DWC piping is the latest innovation that Danco has brought to the sanitation industry. Manufacturing sizes from DN100 up to DN600, DWC is set to revolutionize piping for Sanitation and Drainage. The complete system with fittings is manufactured to ISO Standard at Danco.

Key benefits include:

1. Durability: 100-year lifetime; strong and reliable
2. Crack-resistant: stronger; lower failure rate
3. Flexibility: better load capacity; more protection on unstable soils
4. Lightweight: easy to install; cheaper transport costs
5. Corrosion-resistant: longer lifetime; lower operational maintenance
6. Abrasion-resistant: better hydraulics
7. 6-meter length: less joints; faster installation time
8. Leak-tight joints: less leaks and better system
9. Available in SN4 (4KN per Sq. Meter) and SN8 (8KN per Sq. Meter)
10. Does not deteriorate under methane attack.

TELECOMMUNICATION

TELEFLEX
 FIBRE OPTIC DUCTING

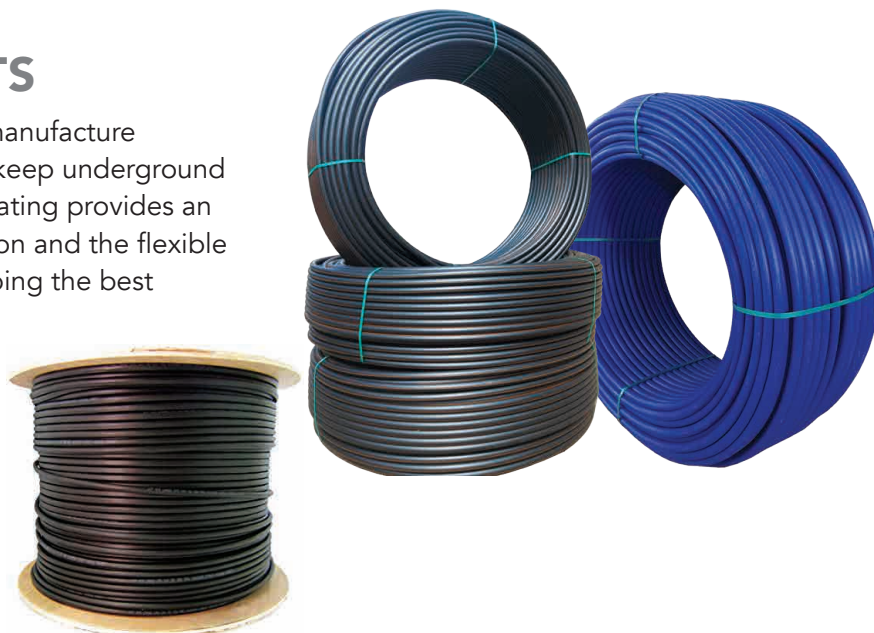

We are Africa's leading manufacturer of HDPE duct used in the telecommunication sector. We partner with a number of international like minded firms to bring end to end long lasting solution that improve lives through innovation and education.

TELEFLEX PIPES/DUCTS

Using our specialized 3-layer machine we manufacture silicone coated telecom ducting for use to keep underground cabling safe and protected. The silicone coating provides an ultra-smooth inner surface for minimal friction and the flexible ducting are made with no added filler, keeping the best properties and avoiding cracking on site.

CABLES

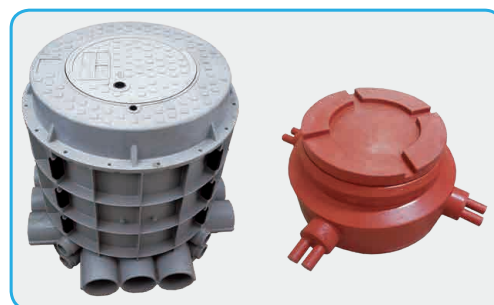

- ADSS Cable
- Micro Cable
- Normal Cable

MANHOLES & HANDHOLES

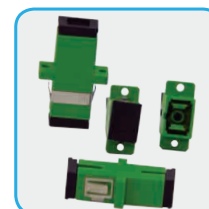

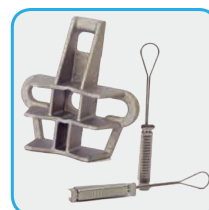

RHINODE 600 AND 1000

Our manholes are manufactured from sheet moulded compound (SMC) which is a ready to mould glass-fibre reinforced polyester material used in compression moulding.

TELECOMMUNICATION ACCESSORIES

- ADSS
- Closure
- ATB
- FAT
- Fibre Patch cords
- Optical Fibre pig tails
- Straight couplers 14/10mm
- Endcaps/plug/stops

**WE OFFER
SOLUTIONS FOR
THE FUTURE**

**We are more than
just pipes, we build
connections**
